(54) Title: FOOT-PROPELLED WHEELED HOBBY AND/OR SPORT DEVICE

(57) Abstract: The invention relates to a foot-propelled wheeled hobby and/or sport device which has a wheel (1) situated between two side-plates (2; 3), and the side-plates (2; 3) are suspended on the axle (X) of the wheel (1). Foot-boards (5) situated below the axle (X) of the wheel (1), protruding outwards are connected to the side-plates (2; 3). In the course of the appropriate use of the device (I: II) the side-plates (2; 3) project over the knee of the user (12) standing on one or both of the foot-boards (5), providing a supporting surface (a) for the knee. The invention is based on that at a certain distance (c) behind the wheel (1) - with respect to the travelling direction - there is a structure in the range of the track of the wheel (1) ensuring stabilisation against tilting, and in order to relieve the knees of any load the side-plates (3) are constructed with a height (L) ensuring a supporting surface (b) for the user's (12) thigh.
